PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building responsive web applications using React JS, Python, and Django. Skilled in front-end development, RESTful API integration, and version control with Git. Strong foundation in MySQL and MongoDB database design. Completed industry job simulations in front-end engineering and data analytics. Eager to apply strong problem-solving skills and modern web development practices in a full stack developer role.

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript, HTML5, CSS3
Frameworks & Libraries:	React JS, Django, React Router
Databases:	MySQL (SQL), MongoDB (NoSQL)
Tools & Platforms:	Git, GitHub, VS Code, RESTful APIs, LocalStorage, Tableau, Excel
Concepts:	Responsive Web Design, Authentication & Protected Routes, Component-Based Architecture, Agile/Team Collaboration

PROJECTS

CareerConnect — Job Finder & Application Tracker

React JS Project | 2025

- Developed a full-featured job portal dashboard enabling users to browse, search, and filter job listings by role, location, and category.
- Implemented user authentication and protected routes using React Router, restricting dashboard access to logged-in users.
- Built persistent save-job and applied-job tracking features using browser LocalStorage, eliminating the need for a backend during development.
- Designed and built reusable React components (JobCard, Navbar, Dashboard) to maintain a clean, modular, and scalable UI structure.
- Delivered a fully responsive interface tested across screen sizes, improving usability on both desktop and mobile devices.

EDUCATION

Raghu Institute of Technology, Visakhapatnam, Andhra Pradesh

Bachelor of Technology in Computer Science and Engineering | CGPA: 6.9/10 | 2021 – 2025

Sri Chaitanya Junior College

Intermediate

J Sikile School

Secondary School

CERTIFICATIONS

Skyscanner Front-End Software Engineering Job Simulation — Forage

June 2026

- Built a front-end web application as a simulated Front-End Engineer at Skyscanner using React.
- Developed a travel date-picker page using Skyscanner's open-source Backpack React component library.
- Customized the application and ran automated tests to verify correct rendering and functionality.

Deloitte Australia Data Analytics Job Simulation — Forage

June 2026

- Completed a simulated data analysis and forensic technology engagement for Deloitte Australia.
- Built an interactive data dashboard using Tableau to visualize business data.
- Used Excel to classify datasets and derive actionable business conclusions.
